

Seed Cycling - Demo

A paid-guide preview about using seed rotation as a gentle educational framework.

What is inside this demo

This sample file is used to test the guide download and checkout preview workflow on the static multilingual website. The final paid guide would be delivered by the external checkout platform after purchase.

The visual layout intentionally mirrors a calm educational handout: generous spacing, concise sections and a short footer disclaimer.

Sample page 1

What seed cycling is and how it is commonly connected to menstrual cycle phases.

Reflection prompt: notice which parts of your daily routine feel supportive and which parts may need a gentler adjustment.

Demo checklist: hydration, protein with meals, sleep consistency, stress load, movement and current supplement use.

Sample page 2

Sample structure: which seeds are used, how to add them to meals, and who should be cautious.

Implementation note: use this page as a placeholder for a practical worksheet, product links, meal ideas or a simple weekly tracker.

This demo keeps the content intentionally brief so the website preview and external-checkout model can be tested quickly.
